DETAILED ACTION

EXAMINER'S AMENDMENT

An examiner's amendment to the record appears below. Should the changes and/or additions be unacceptable to applicant, an amendment may be filed as provided by 37 CFR 1.312. To ensure consideration of such an amendment, it MUST be submitted no later than the payment of the issue fee.

Authorization for this examiner's amendment was given in a telephone interview with James F. McKeown Reg. No. 25,406 on May 21, 2004.

The application has been amended as follows:

Claim 1 line 16, the word "even" has been deleted.

In the ABSTRACT OF THE DISCLOSURE, the first and second paragraphs has been changed to be ONE paragraph; therefore, the space between the first and second paragraphs has been deleted.

Allowable Subject Matter

Claims 1-7 are allowed.

Reasons for Allowance

Application/Control Number: 10/663,746

Art Unit: 3662

The following is an examiner's statement of reasons for allowance: With respect to claim 1, the prior art fails to teach or render obvious the power supply control means for turning off the drain power supply of the FET among the power supplies when it is detected by said voltage monitoring means that either of output voltages of the power supplies is not within the specified range. With respect to claim 2, the prior art fails to teach or render obvious the power supply control means for controlling the gate and drain power supplies at the rise time so that an output voltage of the gate power supply rises earlier than that of the drain power supply. With respect to claim 4, the prior art fails to teach or render obvious the power supply control means for controlling the gate and drain power supplies at the fall time so that an output voltage of the gate power supply falls later than that of the drain power supply. The prior art teaches radar system using high frequency IC with a built-in FET, which is connected to multiple power supplies. However, none of the prior art either singularly or in combination teaches the claimed system.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."

Conclusion

The prior art made of record and not relied upon is considered pertinent to applicant's disclosure. The prior art shows different radar sensors including a built-in FET transistor.

Art Unit: 3662

Any inquiry concerning this communication or earlier communications from the examiner should be directed to Isam A Alsomiri whose telephone number is 703-305-5702. The examiner can normally be reached on Monday-Thursday and every other Friday (8:30-5:00).

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Thomas H Tarcza can be reached on 703-306-4171. The fax phone number for the organization where this application or proceeding is assigned is 703-872-9306.

Information regarding the status of an application may be obtained from the Patent Application Information Retrieval (PAIR) system. Status information for published applications may be obtained from either Private PAIR or Public PAIR. Status information for unpublished applications is available through Private PAIR only. For more information about the PAIR system, see http://pair-direct.uspto.gov. Should you have questions on access to the Private PAIR system, contact the Electronic Business Center (EBC) at 866-217-9197 (toll-free).
